RELEASE NOTE

Application Name: iWinNAC
Bank : All Banks

Release Version: v0.0.3.9.1

Release Date: 09 December 2024

Previous Release Version: v0.0.3.9

CVS/SVN Tag:

Features Added/Bug Fixed:

Note for iWinNAC :

1. iWinNAC is windows native access client. This is basically used to communicate with various devices or client activities like capture photo, RuPay based transactions, passbook printing module, account based finger print capture and other activities.
2. This will act as a server, which will run on 12030 port. The base url is https://localhost:12030/service.
3. Dotnet framework version 4.7.2 is required to be installed on the client system.
4. Copy the base folder to a directory. Then run the command prompt (with admin privilege) and go inside the directory and run the "run.bat" file. This will create a service named "Integra WinNAC" in the client system.
5. Sample test page is there to test the functionalities. This test page is tested in browsers like IE, Firefox and Chrome.

Current version update:

1. Integration done for VRIDDHI & EVOLUTE device printer.
2. UBI logo added.
